### MARKET

#### Secondary & Tertiary Education

All students studying full-time or part-time who want to improve their marks and reduce study time.

### COURSE OUTCOMES

This course facilitates the creative and intellectual awakening and teaches Critical Thinking, Whole Brain Learning and proven Cognitive Study Methods. It is a program of true self-discovery, which facilitates individuals' realization of their power and creative learning capacity by integrating the imaginative, problem solving, and understanding functions of the right-brain with the logical, practical, and strategic functions of the left-brain. This right and left hemisphere integration is essential to learning, long-term memory, understanding and creative invention.

### BENEFITS

- Improved self-belief & confidence
- Whole brain learning
- Realization of full creative potential
- Ignites a passion for learning
- Improved thinking and reasoning skills
- Improved problem-solving skills
- Reduction in study time by 2/3
- Indefinite retention of information
- Accurate recall of information
- Improved grades - guaranteed

### COURSE CONTENT

#### MODULE 1: INTRODUCTION

- 10 Steps to success
- Understanding yourself better
- Whole Brain Learning explained
- Optical illusions
- Self - concept
- Brain puzzles

#### MODULE 2: CRITICAL MEMORY SKILLS

Remembering information as presented, can be difficult for many students, with more unfamiliar words and concepts being introduced in the higher grades and years. This session teaches students how to engage their long-term memory in an exciting way. These techniques help with the retention of all types of information and any subjects.

- Your 2 hemispheres strengths & how they think.
- Visual short-term memory exercises.
- Mastering the long-term memory by simplifying, learning and understanding of unfamiliar Academic Vocabulary and Foreign Languages A - Z.

#### Outcomes

Improved confidence & self-belief - critical components for success.  
Maintain a passion for learning - critical for their development.  
Whole Brain-learning - Using both right and left hemispheres for success.  
Unfamiliar/difficult words simplified - nothing is difficult, just unfamiliar.  
Spelling improved - confidence in writing and reading.  
Indefinite retention of information through long-term memory activation - confidence and less repetitive rote learning.

#### MODULE 3: CRITICAL THINKING & LEARNING SKILLS

Understanding work is important for recall and application. The practical cognitive steps to 'How to Learn' and focus is dealt with in this session. It is important for the student, when learning/studying to be as effective as possible.

- Learning from notes or text books is a 7-step process TPQRWTR™
- Think, Preview, Question, Read, Write, Test, Revise is the learning process.

#### Outcomes

- Develops an enquiring mind - right hemisphere activation.
- Students learn practical steps on how to learn/study on their own, with full understanding of the work they are studying understanding ones work is critical for long-term retention and application.
- A reduction in learning/study time by 2/3 guaranteed - time savings, less pressure at examination time.
- Students learn the art of classification of information - analyzing technique.
- Identifying important concepts or ideas or facts - analyzing technique.
- Being able to find all the possible questions and answers - analyzing.
- The learning of a linear style summarizing technique - brings order and simplicity to their work.
- The ability to identify Keyword/Brain triggers - understanding reinforced.
